## Applied Vision Corporation Reports Record-Breaking 2012 Fiscal Year

**AKRON, OH** – February 4, 2013 – Applied Vision Corporation, the leading provider of machine vision inspection systems for the container manufacturing industry, announced another record-breaking fiscal period which resulted in an aggregate sales growth of 35% since 2008, despite a significant global economic downturn in 2008 and 2009.

Applied Vision continues to successfully capture market share. In 2012, advances in Applied Vision's technology and global support have significantly increased the company's geographic reach into new markets and customer applications. Major customers have replaced competitors' existing inspection systems in North American, Asian, and European plants with Applied Vision's Cyclops® and Genius® vision systems. This trend of robust customer demand will continue in 2013.

"Our place as industry leaders in technological innovation and customer service continues on a global level," said Manijeh Novini, Chief Financial Officer of Applied Vision. "We at Applied Vision aspire to provide jobs, growth and innovation for years to come."

### About Applied Vision Corporation

Applied Vision Corporation designs and manufactures application-specific machine vision inspection systems for the packaging, food and beverage container and color printing industries. Applied Vision systems are sold worldwide through original equipment manufacturers (OEMs), value-added resellers (VARs), full-service distributors and company direct. For more information on Applied Vision's machine vision solutions, visit [www.appliedvision.com](http://www.appliedvision.com).
